

WindShot

IOT Wind LiDARs

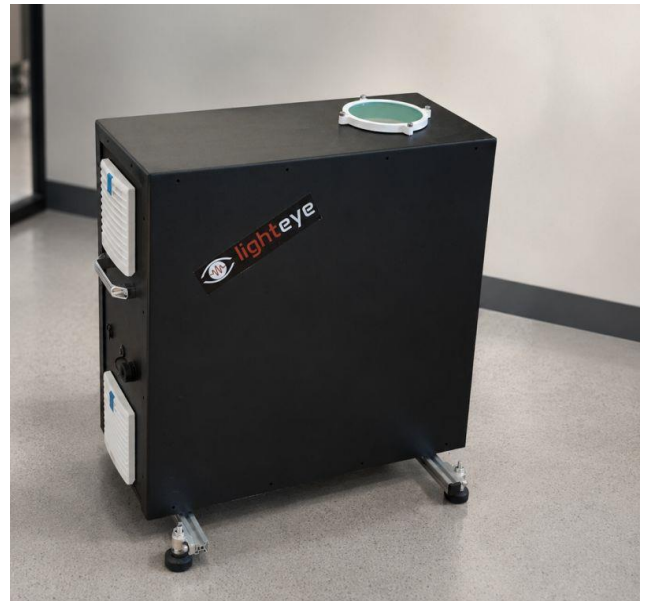

~~"LiDARs: costly and limited."~~

Not anymore.

We are bringing LiDARs to IOT -
and density to high-res forecasts

Features

- Boundary Layer Wind Data
- VAD scanning, pulsed operation
- Wind gusts, shear and turbulence

Why spend €100k+ on a wind LiDAR?

Ours costs €16k.

***Towards LiDAR networks to
conquer the wind.***

TECHNICAL DETAILS

LiDAR	
SPECS	VALUE
Laser	1550 nm, Class 1M (eye-safe)
Max. Altitude	2.5 km (800m@1s, 2.5km@10min)
Height Resolution & Min. Height	20 - 150 m (selectable)
Scan speed	2 Rev/min
Max. wind speed	60 m/s
Wind speed accuracy	<0.2 m/s
Wind direction accuracy	3°
Interface	Ethernet, Python API
Power consumption	40 W (24 V power supply)
Weight	20 kg
Size	50 x 50 x 25 cm ³
